## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 2, 4-6 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 4-6 with the allowable features being image correcting means for correcting a display condition of a target image which is not a designated reference image based on the image pickup condition of the designated reference image and the target image(claim 1); the specific steps in performing the method of displaying retinal images(claim 4); wherein a display control unit corrects a display condition of a target image which is not a designated reference image, based on the image pickup condition of the designated reference image and the target image, and controls a display of the target image based on the corrected display condition(claim 5); correcting display conditions of a target image which is not a designated reference image, based on the image pickup condition of the designated reference image and the target image; and controlling a display of the target image based on the corrected display conditions(claim 6). Therefore claims 1, 2, 4-6 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
